Below is part of a hotel's market report.

Our peak season of the year is from July to August. People from Taiwan come to spend their summer vacation here in Okinawa at this time of the year. There are a lot of great hotels to choose from here. If we want more guests to stay at our hotel, we can cut down the prices of our rooms during the two months. Besides, because our hotel is far away from the train station and bus stops, we should think about having free buses to pick up our guests. Many guests said that it was not very convenient to get to our hotel.

We don't have many guests during Thanksgiving and Christmas time, but it is the second peak season. Now, people like to book hotel rooms, invite all the family to get together and have fun at the hotel. For their family trip, our guests need rooms for eight to ten persons at least. This fact pushes us to start our new plan to have more room types to meet the needs of the market. By doing this, we may bring in more business to our hotel.

Plastic makes our lives easier, but it is also making the planet, animals, and people sick. We can see it everywhere. Every year, over seven billion kilograms of plastic goes into our oceans alone. Because of this, many people want to stop using plastic.

Taiwan is one of the countries trying to solve the problem. In 2019, the country started by banning some restaurants from giving plastic straws to customers. Now, many shops don't give people straws because of the environment.

Taiwan is not the only place doing this. For example, Great Britain, Scotland, and some US and Canadian cities are also trying to stop people from using plastic straws. Because straws are not necessary, we don't have to take them when we buy anything.
